**Airport Systems
Resource Management Xpress (AS-RMSX)**

Key decisions require direct access to real-time operational data

Optimize airport management and growth - all the insights on airport resources and flight schedules, now in one place.

- Optimizing airport resources and maximizing revenue is a difficult task
- Arrival and departure delays lead to unhappy passengers and negative press
- Manual planning cannot keep up with fast paced changes or scaling operations
- Decision making suffers with no single source of operational information
- Every second of delay is money and time lost

If you're a senior executive at a small to medium-sized airport and facing any one of these problems, look no further than Airport Systems Resource Management Xpress (AS-RMSX).

The cloud-based software as a service (SaaS) AS-RMSX takes the most powerful features from our industry-leading AS-Resource Manager and packages them as a low-cost, quick set-up solution that delivers a unified view of assets – gates, stands and baggage reclaim stations.

The real-time, intelligent resource management solution helps airport and airline leadership make the right decisions by providing an accurate and holistic view of flight operations and airport resource allocation.

The data you need to drive board room decision making

Reports that get you the stats and facts:

- Resource utilization
- On-time performance

Integrate with your current reporting software:

- QlikView
- Tableau
- SQL server reporting services

Integrate with your aeronautical billing system

Budget friendly

Affordable monthly SaaS subscription fee instead of a capital expense.

Deploy in the Cloud or host on-site

You choose. Either way you get a turnkey solution that includes online training and 24/7 support.

Get set up quick

Online setup and configuration in the AWS Cloud gives you a fully operating platform in days with the option to scale as you grow.

Airport Systems
Resource Management Xpress (AS-RMSX)

A single source of operational information

Flight and resource planning management for small and medium-sized airports

- Reduce delays and disruptions to deliver a better passenger experience.

- Enrich quarterly and annual reports with real-time operational data.

- Use historical data to paint an operational picture for your executive team, board members, non-operational staff and the community.

- Get insights regarding patterns related to conflicts, delays/cancellations and growth opportunities.

- Share canned reports with useful metrics like gate and stand usage, or integrate with third-party reporting.

- Share view-only pages and reports with non-operational staff to increase situational awareness.

AS-RMSX

A simpler way to tackle operational complexity for real-time, intelligent airport resource management and growth.

- QUICK SETUP
- CLOUD BASED
- SOFTWARE AS A SERVICE
- SCALABLE
- LOW COST
