

# A more flexible way to grow airport routes and operations profitably

## Provide stakeholders with a clear vision for growth - all the operational data needed, now in one place.

- Are your airline partners asking for broader and deeper insights on growth opportunities?
- Would you like to scale your airport's routes but don't know where to start?
- Do you lack the data needed to sell a growth idea to your airport leadership?

If you're in air service development at a small to medium-sized airport and facing any of these problems, look no further than Airport Systems Resource Management Xpress (AS-RMSX).

The cloud-based software as a service (SaaS) AS-RMSX takes the most powerful features from our industry-leading AS-Resource Manager and packages them as a low-cost, quick set-up solution that delivers a unified view of assets – gates, stands and baggage reclaim stations.

The result is a real-time, intelligent resource management solution that offers air service developers the flexibility to grow airport routes and operations profitably, using valuable data on airside resources via one tool.

### **Easy scheduling and route planning**

- Rich, dynamic visualization tools provide an accurate view of flights and resource allocation at a glance.
- Birds-eye situational awareness – user interface for intelligent airport-wide view of day-to-day operations.
- A sandbox for planning, trials and what-if scenarios on schedule changes, resources and rules.
- Comprehensive problem alerts and resolution assistance.
- Automatic responses to flight schedule changes.
- Resource status management.
- Active flight management.
- Simple rule application.
- Canned reporting with useful metrics like gate and stand usage.

### **Get set up quick**

Online setup and configuration in the AWS Cloud gives you a fully operating platform in days with the option to scale as you grow.

### **Time is money**

Our subscription-based SaaS solution is affordable and geared for automation, a quick setup and ease of use.

### **Designed for simplicity**

All the critical data in one place and team members only see the information they need leaving zero chance for unnecessary distractions.

## Airport Systems Resource Management Xpress (AS-RMSX)

# Flight and resource planning

### Optimized for small and medium-sized airports

- Deploy in the Cloud in one click or host on-site.
- Grow your airport like a profitable business easily, with greater flexibility.
- Expand and scale your airport's routes and operations.
- Bolster negotiations with airlines using solid operational and historical data.
- Quickly and easily demonstrate growth opportunities to your airport board, key executives and airline stakeholders, relying on accurate operational data and reports.
- Easily check if your airport's available resources can accommodate a new carrier's aircraft types.
- Provide a holistic view of your season - identify your busiest days/hours.
- Plan growth - analyze your bottlenecks at peak times, and know which days and what times of the year you have room for growth.
- Easily conduct seasonal, day of, and what-if scenario planning so you can simulate the effects of adding new routes and carriers.

### AS-RMSX

A simpler way to tackle operational complexity for real-time, intelligent airport resource management and growth.
