

Press Release

Dubai - May 09, 2016

ADB Safegate shows new ways to help airports maximize throughput

First integrated display since merger illustrates stronger and deeper capabilities that enable superior airport performance from approach to departure

At the Dubai Airport Show, ADB Safegate will offer compelling insights on how airports can seize opportunities and resolve key challenges to deliver a better experience. In its first joint showcase since the merger, ADB Safegate is displaying the industry's largest portfolio of intelligent solutions for the airfield, gate and tower, and its expertise in integration, turnkey projects, services and maintenance. Visitors will learn how ADB Safegate brings these together to increase throughput with existing infrastructure and enhance airport performance around safety, efficiency and sustainability.

"Around the world, airports looking to manage the demands of increasing air traffic in a faster, safer and more sustainable way, often invest in infrastructure expansion. At ADB Safegate, we know the right mix and innovative use of technologies for the airfield, tower and gate, can resolve this and other challenges, and deliver even better results," said Christian Onselaere, CEO, ADB Safegate. "With our combined experience, expertise and reach, we're working with airports to jointly identify and implement new and often more cost effective ways to seize opportunities and keep pace with the changing dynamics of aviation."

ADB Safegate's solutions are particularly relevant for the Middle East, one of the fastest growing aviation markets in the world. ADB Safegate has a well-established regional presence with a Center of Excellence managed by a competent team. With more than 40 years of experience in the region, ADB Safegate is the partner-of-choice to several airports including The Hamad International Airport which opened in 2014 and Abu Dhabi International Airport, where a massive expansion project is underway.

**Showcase at Booth #6470, Airport Show, Dubai
May 9 - 11, 2016**

ADB Safegate will showcase intelligent products, solutions and services spanning the Tower, Airfield and Gate. Implementing these helps airports achieve safer, more efficient and sustainable airfields, automated and efficient gate operations and intelligent routing and guidance with full control at the tower.

Having supported more than 2000 airports globally, ADB Safegate's expertise extends to integration, services and maintenance, enabling a whole new level of airport performance. Integration of systems helps airports leverage data for safer and more predictable movement and guidance while services and maintenance deliver greater availability. The final outcome is a significant increase in air traffic throughput and performance, with all elements of the airport working smoothly and in the most efficient way, like clockwork, from approach to departure.

Innovative Insights on beating Airport Capacity Crunch
May 9, 15:15 to 15:45 hours

At the Airport Show's Innovation Podium, **ADB Safegate's Roy Bolwede, GM Airport & ATM Operations Solutions**, will present real life examples on how airports can benefit from a new view on increasing airport capacity without unnecessary investments, and by revisiting their operational set up and introducing innovative solutions.

Visitors to the ADB Safegate booth can also meet with experts to understand how their airports can benefit by partnering with ADB Safegate

About ADB Safegate

ADB Safegate is a leading provider of intelligent solutions that deliver superior airport performance from approach to departure. The company partners with airports to analyze their current setup and operations, identify bottlenecks, and jointly solve them using a consultative approach that enables airports to improve efficiency, enhance safety and environmental sustainability, and reduce operational costs.

Our integrated portfolio includes solutions and services that harmonize airport performance, tackling every aspect of traffic handling and guidance, from approach, runway and taxiway lighting, to tower-based traffic control systems, and intelligent gate and docking automation. ADB Safegate has more than 900 employees in more than 20 countries and operates in more than 175 countries, serving more than 2,000 airports.
