

# Ensure airfield compliance and performance with ICAO Compliant Assessments

Through ADB SAFEGATE's ICAO TRAINAIR PLUS Training Academy, we offer an extensive range of assessment with airfield visual aids. We assess airfield operation and maintenance structures worldwide to highlight optimizations, non-compliance and safety issues.

## Why Choose ADB SAFEGATE?

As a manufacturer, we are well positioned to understand how AGL equipment should be included during design, installed, operated and maintained.

We understand the challenges airports face in maintaining operational efficiency, safety, and compliance. That's why we've developed a proven, four-pillar approach to airfield maintenance excellence.

### Proven Expertise:

Decades of experience in airfield maintenance and consultancy.

### Global Reach:

Trusted by airports worldwide to deliver ICAO-compliant solutions.

### Tailored Approach:

In-depth assessments and recommendations to meet your exact need

### Sustainable Results:

Minimized disruptions, enhanced safety, and long-term operational efficiency.

## Our Four Pillars of Airfield Maintenance Excellence

**Take the First Step  
Toward Airfield  
Excellence**

Partner with ADB SAFEGATE to transform your maintenance approach and achieve unparalleled operational performance.

Contact us today to schedule a tailored assessment and discover how we can help you optimize your airfield operations.

# 1

## Healthy Installed Base: Maximize The Lifespan Of Your Critical Assets

### THE CHALLENGE:

Aging infrastructure and undetected issues can lead to costly safety and downtime risks.

### OUR SOLUTION:

Systematic health checks and condition analysis to ensure your airfield systems are operating at peak performance through.

### WHAT WE OFFER:

- Comprehensive health checks for AGL fixtures and A-VDGS equipment
- Maintenance of airport electrical systems, including power cables, transformers, and substations
- Airfield systems audits to identify inefficiencies
- Power supply and distribution analysis
- Circuit health checks and insulation analysis

# 2

## Clear & Adequate Standard Operating Procedures (SOPs): Build A Strong Maintenance Framework

### THE CHALLENGE:

Ambiguity in processes can lead to inefficiencies, safety risks, and compliance issues.

### OUR SOLUTION:

We help you establish clear, actionable SOPs that enhance safety, streamline operations, and foster continuous improvement.

### WHAT WE OFFER:

- SOP review and correction to align with best practices
- Documentation management audits and consultancy
- Risk analysis and risk management consultancy

# 3

## Right Tools, Equipment & Spare Parts: Empower Your Teams For Success

### THE CHALLENGE:

Inappropriate tools and maintenance equipment can delay maintenance and increase operational costs

### OUR SOLUTION:

We ensure your teams are equipped with the right tools, equipment, and spare parts to perform at their best.

### WHAT WE OFFER:

- Audits of tools, equipment (including PPE), and spare parts
- Evaluation of your airfield maintenance systems
- Alignment of consumables and tools with SOPs and system requirements

# 4

## Competent Employees: Build A Skilled And Reliable Workforce

### THE CHALLENGE:

Skills gaps and inadequate training can compromise safety and efficiency.

### OUR SOLUTION:

We assess your workforce's competence and provide tailored training solutions to ensure your team is prepared to handle complex airfield systems.

### WHAT WE OFFER:

- Competence assessments to identify skill gaps
- Evaluation of training management systems and learning plans
- ICAO-compliant training programs to maintain workforce excellence
