

Sustainable Procurement Purchasing Policy

ADB SAFEGATE has established a policy to ensure that our procurement activities are conducted in a manner that is both environmentally and socially responsible. This policy reinforces our dedication to enhancing our reputation as a sustainable business.

Aligned with our QHSE Policy, we will strive to integrate environmental and social factors into our procurement processes.

Our commitment includes:

- Encouraging our employees to review their consumption of goods and services to minimize usage at work wherever possible
- Striving to identify and provide sustainable products and services to our customers.
- Under comparable circumstances of price and quality, prioritize local suppliers and subcontractors, when possible, to minimize the environmental impact related to transportation and local economy.
- Favoring, when possible, suppliers who have integrated sustainable and ethical practices within their organizations and promote such practices within their own supply chains.
- Aiming to avoid the use of materials and substances with hazardous properties and processes that could harm the environment and health.
- When technically possible, encouraging the reuse/recycling of materials as a priority (rather than purchasing new materials) and promoting waste reduction at all levels.
- Increasing awareness of this policy among employees and the supply chain.

ADB SAFEGATE acknowledges its crucial role in achieving a more sustainable future and will incorporate this procurement policy as a component of our comprehensive sustainability strategy.
